

Full Name:

Semantics: Metaphor Tutorial

Francis Bond <bond@ieee.org>

1. Lakoff and Johnson (1980) proposed the following image schemas for love:

- LOVE IS A JOURNEY
- LOVE IS A FORCE (electromagnetic, gravitational)
- LOVE IS WAR

Organise the following metaphors into the above three schemas.

- (1) *They lost their momentum*
- (2) *There were sparks between us*
- (3) *Look how far we've come*
- (4) *We're at a crossroad*
- (5) *He overpowered her*
- (6) *I could feel the electricity between them*
- (7) *We'll just have to go our separate ways*
- (8) *We can't turn back now*
- (9) *His whole life revolves around her*
- (10) *She is besieged by suitors*
- (11) *They are uncontrollably attracted to each other*
- (12) *He is known for his conquests*

Can you think of other metaphors that do not fit into the above three schemas?

2. Match the metonymy with its type

- | | |
|---------------------------------------|----------------------------|
| a. The ham sandwich wants the bill. | i. PART FOR WHOLE |
| b. She drank the whole bottle. | ii. ATTRIBUTE FOR PERSON |
| c. Oxford published a new dictionary. | iii. OBJECT FOR USER |
| d. All hands on deck. | iv. PLACE FOR INSTITUTION |
| e. The university raised tuition. | v. CONTAINER FOR CONTENT |
| f. The suits approved the merger. | vi. INSTITUTION FOR PEOPLE |

3. For any two languages that you know, discuss similarities and differences in conventionalized metaphors of body parts (e.g. *hand of a watch*, *kao-ga hiroi* "well-known (lit: face is wide)").
